

MESSAGE FROM THE GENERAL MANAGER

Unplug with meaningful community programs

Most adults have a vague memory of a time when “checking for messages” meant listening to an answering machine. We carried on with our days without relying on cellphones and managed just fine. But today, we are more connected than ever through our smartphones and other devices.

Our phones are so much more now — from cameras to calendars to social media connections — and truly disconnecting from them can be tough. But it’s even harder for our kids to unplug because they only know life with these tiny screens. It’s difficult for them to imagine life without computers, gaming devices, tablets, or cellphones.

But there’s great value in unplugging for children *and* adults, even if it’s for just a short period of time. For kids, time away from the screen to be outside with other children allows them to connect with nature and others in a way that a virtual experience simply does not allow. They are able to experience life in the moment and allow their creativity and energy to break free.

Fortunately, we have access to great community programs and organizations like 4-H, Boy Scouts, Girl Scouts, and FFA that provide children and teens with a safe place to play, learn, and grow, while cultivating new skills and interests.

These types of clubs and programs offer kids an opportunity to explore activities and interests outside of school academics. Children can investigate areas they might not otherwise have access to and discover new interests and passions. They often learn new skills and strengthen existing ones. It’s no secret that the broader the range of experiences and activities children are exposed to, the more likely they are to find their own path and possibly a career. Community programs also foster important leadership development and public speaking skills. Through guided and informal play and activities, children learn problem-solving and interpersonal skills that enable them to resolve conflicts peacefully and improve interpersonal relationships.

Adults can also find meaningful opportunities to spend time with the kids when we all unplug. From board games to craft projects to playing in the park, there are many ways we can unplug for some family fun.

While you and your children are disconnecting, take a moment to identify potential energy savings. Unplug electronics that are not in use to avoid “vampire” energy loss. This is the energy that is drained from technology and electronics even when they are not in use. For example, although it is turned off, your TV is waiting to receive a signal from the remote and your DVR is waiting to record the next show or perform an update.

Let’s encourage youngsters to step away from the screens to play and be part of an organization that helps them connect with others and find meaningful interactions and explore new activities and interests.

When you do plug back in, Guernsey-Muskingum Electric Cooperative is here to help you save money and energy by connecting you with our energy-saving programs and services. While we’d love to see you in person, we’re also just a call or click away.

Brian Hill

Electric trucks and SUVs are coming

The Ford F150 Lightning is changing minds across America about what an electric vehicle can do. In fact, Ford declared this is their best truck to date — not best electric vehicle, but best truck, period.

Electric SUVs are available now and pickups will be soon. This development has been anticipated for years. Electric vehicle (EV) sales are about 24 times higher than they were 10 years ago, with several factors driving demand:

- The instant torque from electric motors boosts acceleration.
- The low center of gravity improves handling and reduces rollover risk.
- The superior traction control of electric motors can increase off-road capability and safety in winter.
- The upfront cost of an EV purchase is now more competitive with similar internal combustion models, and most EVs qualify for a federal tax credit.
- The cheaper operating fuel cost per mile (for electricity) compared to gasoline or diesel is another attractive feature for drivers.

Ford's electric F150 Lightning is scheduled to arrive in spring 2022, starting under \$40,000 for the commercial trim package (230-mile range model). A 300+ mile battery is an option, and all models are four-wheel-drive with respectable towing and payload capacities. The Lightning is also equipped to provide 9.6 kW of home backup power or portable power for a job site.

Tesla has more than a million preorders for their new Cybertruck, which will likely arrive in 2022. The 250-mile-range, two-wheel-drive model starts under \$40,000 and steps up to \$50,000 for the 300-mile range four-wheel-drive model. Tesla plans to offer a 500+ mile range version for \$70,000 that can tow more than 14,000 pounds.

GMC has announced a late 2021 release of an electric Hummer with 1,000 horsepower and additional features for off-road performance.

Rivian, a startup backed by billions of dollars from Ford and Amazon, is planning to unveil their R1T electric pickup later this year.

Crossover SUVs (CUVs) are one of the most popular types of vehicles, and a number of manufacturers say they'll have electric models available soon. Ford's Mustang Mach-E is available now with a range up to 305 miles, starting at \$45,000. Volkswagen's ID4 CUV starts at \$40,000 and is available with all-wheel-drive options. More electric SUVs are coming, including Rivian's R1S, Nissan's Ariya, and Volkswagen's six-passenger ID6.

Ford's all-electric F150 Lightning, arriving spring 2022, can provide portable power to a job site.

Rivian's R1T all-electric pickup is available now.

Tesla is expected to make the Cybertruck available by early 2022.

And it's not just vehicles that are shifting to electric. Electric snow machines and jet skis are arriving soon. Even large construction equipment like excavators, backhoes, and heavy-duty trucks will have electrically fueled models.

One remaining hurdle for increased EV adoption in rural areas is fast, sufficient charging for longer trips. Most EV owners charge at home, but more fast-charge stations on rural highways will be helpful.

If you're interested in an EV, call our office. We can discuss your charging options as well as your electricity needs with your new vehicle.

Official notice of medical certification

Medical certification forms are available upon request at the Guernsey-Muskingum Electric Cooperative, Inc. office for those persons who must certify that disconnection of electric service would make the operation of necessary medical equipment impossible or impractical or that such discontinuation of electric service would otherwise be dangerous to the health and welfare of persons residing in the household.

In all cases where discontinuation of service would be especially dangerous to life and welfare of the occupants within a household, the consumer should contact the cooperative and request a "Medical Certification" form. This form must then be completed and certified by a licensed physician or local board of health and filed with the cooperative.

OFFICIAL NOTICE Certification of Active Duty Deployment Guernsey-Muskingum Electric Cooperative, Inc.

The cooperative will not disconnect electric service to the residential premises of any residential member who is deployed on active duty for nonpayment for electricity provided to the residential premises.

Upon return of the residential member from active duty, the cooperative will offer the residential member a period equal to at least the period of deployment on active duty to pay any arrearages incurred during the period of deployment. If the period the cooperative offers the residential member for repayment presents a hardship, the member may request a longer period to repay the arrearages. No late payment fees or interest will be charged to the residential member during the period of deployment or the repayment period.

"Active duty" means active duty pursuant to an executive order of the president of the United States, an act of the Congress of the United States, or section 5919.29 or 5923.21 of the Ohio Revised Code.

The residential member must resume the timely payment of all charges for electric service provided by the cooperative after the return from active duty deployment.

In order to avoid disconnection of electric service for nonpayment for electric service during a period of active duty deployment, a completed Certification of Active Duty Deployment form must be submitted to the cooperative. Certification of Active Duty Deployment forms are available from the cooperative upon request.

The Guernsey-Muskingum Electric Cooperative office will be closed on Monday, September 6, so that our employees and their families can celebrate Labor Day.

For outage assistance, call 800-521-9879.

We wish you a safe and fun Labor Day weekend!

GUERNSEY-MUSKINGUM ELECTRIC COOPERATIVE CURRENTLY SPEAKING

Would you please help your cooperative find former members?

Guernsey-Muskingum Electric would like your help in locating the following former members (or their heirs) who received service from the cooperative in prior years.

Capital credit refund checks were mailed to former members listed in this *Ohio Cooperative Living* issue. These checks have not yet cleared the bank or have been returned to Guernsey-Muskingum as “undeliverable.”

If you have information on any of the names in the capital credit refund listing, please call the cooperative office at either of the numbers listed below and provide the information to the member accounting department.

The cooperative is aware that many of the former members listed are deceased. However, we are looking for surviving family members who are eligible to receive the capital credits check. Thank you for your help in locating our former members.

ANNUAL MEETING RECAP

Due to the concerns about the COVID-19 pandemic, the 83rd annual meeting of members was held at the Guernsey County Fairgrounds on Tuesday, July 13.

Members reelected Duane Parks, District 2; Shirley Stutz, District 6; and Ed Bay, District 7 to two-year terms on the board of directors. Maureen Riley, District 1; and John Enos, District 4, were reelected to three-year terms. Members also passed three amendments to the cooperative's Code of Regulations: lengthening the time allowed for notice of the annual meeting, changing the notification of patronage capital returns, and granting emergency powers to the board for holding annual meetings and elections in cases such as a pandemic. The full Code of Regulations can be found on our website, www.gmenergy.com, and paper copies are available upon request.

GMEC Board President Jay Gray reported on cooperative achievements during 2019 and 2020. Ed Bay, secretary-treasurer, reported on the cooperative's financial status. General Manager/CEO Brian Hill informed members of the cooperative's activities over the last two years, including broadband efforts, House Bill 6, working through a pandemic, and the beginning stages of implementing a smart metering system.

NATIONAL FARM SAFETY AND HEALTH WEEK

Sept. 19–25

Visit necasag.org

to explore this year's daily farm safety topics, attend webinars to help keep you and your community safe, and learn where you can find more resources.

Energy Efficiency Tip of the Month

Energy used for cooling and heating your home makes up the largest portion of your monthly energy bills.

By combining regular equipment maintenance and upgrades with recommended insulation, air sealing, and thermostat settings, you can save about 30% on your energy bills while helping our environment.

Source: www.energy.gov

Is your name and account number here?

If it is, call the cooperative's office and receive a FREE home change-out to LED lightbulbs (limit six bulbs). Thanks for reading the local pages of *Ohio Cooperative Living* magazine.
